

It is located in the village called Donji Brčeli, with a church dedicated to St. Nikola. The monastery was constructed in the 15th century. An arched room was constructed under the floor of the chapel and you can enter it through the hole made in the floor of the altar area. It is believed that this room was used as a dungeon during the reign of Šćepan Mali,. Later, Šćepan Mali was murdered and buried in this church.

Within the monastery was a school, which had previously been in the Gornji Brčeli Monastery.
